## DOGS TO CATCH SMUGGLERS.

Special Cable to The Washington Herald. Geneva, June 13.—Dogs and bells are to be used in the future on the Italian and Swiss frontiers owing to the amount of smuggling of contraband goods from Switzerland, which is causing the greatest annoyance to the Italian government authorities.

The loss to the government has been so great that the Italian government has decided to fence in practically the whole of the frontier with netting. This has already been done at certain points along the frontier, the longest stretch being from Luno to Ponte Tresa.

The netting is about nine feet high and to it is attached bells, which the moment the netting is touched or trodden on creates such a ringing that all the customs officials are immediately on the alert for some distance along the line.

It has also been decided to increase the number of posts and employes. These officials will be provided with police dogs, the animals being to attack and catch smugglers and to fight their dogs.
